## PRODUCT DETAILS

### PIONEER VSX-933

Your 7.2 System, powered by the network receiver, an entertainer which is satisfying all your audio-visual wishes. Equipped with seven powerful output stages, each with 135 W, which minimise electricity consumption and waste heat by using Pioneer's exclusive "Direct Energy" technology, the VSX-933 delivers a cinema-like movie and sound experience.

Thanks to the "Reflex Optimizer", it is able to produce a fascinating sound experience with a spacious, all-encompassing atmosphere and precisely placed three-dimensional effects, even with the use of indirectly projecting Atmos-enabled speakers.

With Dolby Atmos or DTS:X generated surround sound and a video output in Ultra HD every movie will be a high-quality experience. With its extended hardware outfit of 6 HDMI inputs, all 4K/4:4:4/60p/24bit and compatible with the HDR10, Dolby Vision, HLG and BT.2020 colour, space and dynamics extensions, Zone 2 Pre/Line Outs, HiRes/DSD-Support and Amazon Prime Music\* as additional integrated streaming service the network receiver was further completed in its functions. Of course, also Spotify, TIDAL and Deezer users can still enjoy their favourite streaming service.

Thanks to Chromecast built-in and DTS Play-Fi music from your mobile device, as well as internet radio, can be streamed by this entertainment star, which easily can become the centre of your multiroom network at home, by using the integrated Pioneer FlareConnect Technology.
