In-Ear Wireless Headphones with 6 mm rare-earth-magnet drivers, ultra-long 5-hour playback and IPX5 water resistance

Colour

PRODUCT DETAILS

Perfecting every facet of truly wireless design

The C5truly wireless liberates your music from cable mess. Equipped with 6 mm (1/4) rare-earth-magnet drivers that produce deep bass and sparkling mid-range sound, these snug-fitting earphones feature Bluetooth® 5.0 wireless technology and are compatible with the AAC codec. Continuous playback extends to five hours while the supplied Quick Charge carry-case refreshes the earphones for another hour's entertainment in just 15 minutes. Total on-the-go playback is 15 hours*. Simple button-presses enable hands-free music and call management, while Ambient Awareness mode, Auto Pairing, Auto On/Off, IPX5, and voice-assistant access highlight user-friendliness.

Truly free to feel music

Be wowed by Pioneer sound without irritating cables. Refined 6 mm (1/4) rare-earth-magnet drivers produce powerful, taut bass while a deep inner-ear fit isolates for clarity.

Ultra-long 5-hour playback and Quick Recharge

The C5truly wireless returns five hours of continuous playback. A pocket-sized carry-case extends playback time up to 15 hours. It features a Quick Charge function that provides enough energy for an hour of playback in just 15 minutes.

Stay connected to the outside world

Ambient Awareness mode activates built-in mics (and adjusts volume) so you can hear the outside world without taking out your earphones or stopping your entertainment. Listen to announcements, pay at the store, and hear your surroundings whenever necessary.

Auto Power On/Off and Auto Pairing

The C5truly wireless powers on automatically when popped from its carry case. Following a simple initial pairing process, it will connect to registered devices automatically for a seamless transition to your music world.

IPX5 water-resistance against sweat and rain

It's reassuring to know these earphones carry IPX5 water-resistance

against spray from any direction. Use with confidence when exercising and don't worry if the weather catches you out.

Wireless calls and phone assistant activation

Hands-free phone conversations and voice-assistant interaction are supported wirelessly. Single-button panels on both earphones control playback, manage calls, and activate your device's supported virtual assistant.
