In-Ear Wireless Headphones

PRODUCT DETAILS

Truly wireless earphones are all about balance, and the C8s from Pioneer are on the money. Sound is excellent with deep bass from rare-earth-magnet drivers and AAC codec delivered via Bluetooth® wireless technology.

Battery life is b: charge up for three hours of listening and the carry-case will fill the earphones twice before needing a charge. Voice access to smartphone assistants, hands-free calling, and music control come via buttons designed for human fingers.

The C8 works with an Android™ app that reads out notifications, a feature unique to Pioneer. But the difference is in the detail: unique L/R shapes, body-agnostic charging ports, textured silicon sleeves for grip, and LED battery indicator on the case. Light, practical, immersive... the C8 truly wireless has freedom you need.

Audio features

- Type: Fully enclosed dynamic headphones
- Driver: 6 mm rare-earth-magnet dynamic driver
- Frequency response: 4 Hz–22 kHz
- Deep, lively bass and clear detail articulation
- Supports AAC codec for high-quality wireless audio transmission
- Deep inner-ear fit for excellent bass immersion and seal
