### PRODUCT DETAILS

#### CLASS AND A GREAT DEAL OF MASS

The A-70DA, which weighs more than 17 kilos, is not just about mass, it is above all about class: Separate main transformers for pre-amplifier and amplifier sections, when individually cast and shielded as here, provide not only weight, but also working conditions with unsurpassed low interference for the audio circuitry.

#### PLAY HIGH-RESOLUTION AUDIO FILES

Connect your computer directly via the asynchronous USB port. The integrated ESS ES9016S D/A converter processes signals itself with top resolution types such as Quad DSD with up to 11.2 megahertz, and PCM files in WAV or FLAC format with up to 384 kilohertz and 32 bit.

#### EFFICIENT AMPLIFICATION

The highly-efficient MOSFET Class D amplifier supplies 90 watts per channel and facilitates extremely dynamic, detailed and precise sound reproduction.

#### PERFECT FOR LOVERS OF VINYL

Connect your record player very easily to the phono input using an MM system and enjoy your vinyl collection in the best quality.

### Specs

#### Product Attributes

EAN:	4988028316982
Manufacturer number:	A-70DA-S/SYXEV8
Product weight:	12.186 kilograms

#### Dimensions and Weight

Product weight:	12.186
-----------------	--------

Packsize height:	26.8
Packsize width:	52.9
Packsize length:	46.7
