PRODUCT DETAILS

Conventional stereo receiver with Bluetooth

Sometimes you don't need an endless list of features, but simply a good stereo amplifier with few control elements but sufficient connections. The SX-10AE offers all of that – and its housing in the classic hi-fi format also features an integrated Bluetooth receiver in addition to the four line-in jacks, a tape output and the radio component.

Direct energy design

The highly-developed, compact circuit with short signal paths and the best possible protection from disruptive sound effects is designed especially for speedy response behaviour and a clear stereoscopic picture with a fresh sound.

Built-in Bluetooth wireless technology

With Bluetooth® Wireless Technology, you can easily stream songs from compatible devices. This product features A2DP/ AVRCP profiles, with support for SBC/AAC codecs.

Audio features
