### PRODUCT DETAILS

#### **CD and SACD reference player – also as a world class D/A converter.**

The Pioneer development team left nothing to chance with the PD-70AE, consistently pursuing its overriding objective: optimum stereo playback of CDs and SACDs. This consistency is apparent the first time one encounters the player, which weighs a solid 18kg and receives discs in a massive aluminium drawer.

The construction of the housing with double floor, three interior assemblies and encapsulated aluminium drive block serves as the perfect, vibration-free mechanical foundation. Separate power supplies for the digital and analogue switching ranges guarantee spotlessly clean supply voltages.

#### **Works as a premium D/A converter with digital audio inputs**

In addition to being a SACD/CD player, the PD-70AE also functions as a D/A converter for delivering superb sound. The carefully designed build-quality brings out the full potential of the high-performance ESS DAC, letting you enjoy solid sound full of rich details from the connected component.

#### **Analogue/digital discrete power supply circuitry**

The digital and analogue circuitries each have discrete power supply. The PD-70AE is designed with the shortest and the most optimal power supply stage as well as audio signal path, to provide pure and rich sound reproduction.

#### **Shielded CD drive case with anti vibration paint**

The CD drive is housed in a shielded case with honeycomb mechanism cover and anti-vibration paint. The drive base is securely fixed by an aluminium frame, and placed through a floating structure using damping pulp material. This helps to minimise vibration within and outside the drive.

### Audio features

- Works as a Premium D/A Converter with Digital Audio Inputs
- Selected XLR Analogue Terminals (Gold Plated) with Full-Balanced Circuitry

- On/Off Switching Function for RCA Output
- Analogue/Digital Discrete Power Supply Circuitry
- Custom Electrolytic Capacitors for High-Quality Audio
- Lock Range Adjust Function for Reducing Jitter by Adjusting Lock Range Accuracy
- Digital Filter with 3 Modes (SHARP / SLOW / SHORT)
- Aluminium Die-Cast Tray
- Shielded CD Drive Case with Anti-Vibration Paint
- Honeycomb Mechanism Cover
- Aluminium Side Panels
- Rigid Under Base
- Anti-Standing Wave Insulators
- AC Inlet Type Thick Cables
- Playback: SACD, CD, CD-R/RW, DVD-R/RW, DVD+R/RW
- Formats: WAV, FLAC, AIFF, ALAC, MP3, WMA, AAC, DSD
