PRODUCT DETAILS

The quality micro system with Bluetooth streaming, Spotify, web radio and DAB+

Its width of 21.5 centimetres makes this CD receiver of the X-HM 36D a real space saver – but on the features Pioneer did not save, though. The built-in Wi-Fi and LAN port connects the micro-components to the Internet where it opens up whole new musical worlds: thousands of radio stations, clearly presented and constantly updated by TuneIn.

Or Spotify, even though it requires subscription, that provides free access to more than 25 million titles at all times, with daily updated tips, playlists, new albums directly on the release date and a thousand ways to discover new music.
