PRODUCT DETAILS

Slim CD microsystem with Bluetooth, USB, wall-mountable

If you love to have music around, but have limited space in your room, here's the perfect solution. In a simple slim body that can be placed on a shelf or wall-mounted, the X-SMC02 lets you listen to songs via Audio in/USB/Bluetooth connection, play CDs, or enjoy FM radio programmes.

The Auto Wakeup function activated by Audio in connection provides hassle-free instant playback from smartphones or digital audio players. Enjoy the widespreading stereo sound across your room, delivered from the outward-facing speaker units.

Easy to place slim design

Designed to fit almost any space, the X-SMC02 is slim and compact with a simple style that blends well with any room décor, while adding a touch of sophistication. The rear-tapering shape makes it an easy fit for corners, while the slight upward tilt is an ideal form for placing on a table. You can also wall-mount the system with the keyholes on the back.

Room-filling sound with outward facing speakers

The speaker units are faced outward by an 8-degree angle, which allows the sound to spread out to a wide area. Regardless of where you listen, you can enjoy room-filling stereo sound, quite unlike those expected from an all-in-one system.

Everything you need in one

Whether you want to plug & play via Audio in, listen to CD albums, play songs from USB devices, tune in to FM radio stations, or enjoy wireless streaming with Bluetooth, the X-SMC02 has them all. You can even charge your smartphone via USB, or start/end the day with your favourite tune using the Wakeup/Sleep Timer.

Audio features
